

TRAILS

Supply Chain Solutions Pvt Ltd

Optimising.Humanising.Digitising

Who we are and how we started

The traditional method of logistics has a lot of draw backs, and as a whole it is just a very much complicated job as of today, though there are upcoming fleet management systems it just couldn't enter the market as the brokers(aggregators) repel the system as they feel it puts them out of their comfort zone and threatens their very existence.

The company TrailsSCS was conceived to function as a booking(logistic contracts) company with an idea to reduce these complications and make it a simple transaction throughout. Though the company is now doing its part in the logistics sector, it still functions by the conventional methods practised in the industry. We are in the process of practically solving this problem step by step. We currently move shipments all over India and looking forward to increase the number of consignments as well as introduce a fleet management system. We provide individual logistic solutions, storage, distribution logistics and outsourcing solutions. We also engage ourselves with customers to understand their requirements and build solutions custom tailored to serve their needs.

We currently have a fleet of 500+ trucks through numerous associated truck owners and are constantly increasing this number as we speak. What we do to increase this number is well explained in the next slides.

The main play that comes into the picture now is about where and how we are trying to make things better in the current logistics system. To do this we have developed a complete system concept that will manage various online functionalities which makes every single truck trip easier, safer and efficient.

We are also taking steps to ensure a steady flow of trucks and drivers to manage the goods. Our methods and practices to ensure this will be explained briefly ahead in this presentation.

Our fleet currently includes a variety of trucks, the major being:

- All dimension half body trailer
- All dimension container body fixed trailer
- 40 feet import/export container carrying trailers
- All dimension flat bed trailer
- All dimension refrigerated container trailer (Reefer)
- All dimension low bed trailer
- All dimension semi-low bed trailer
- All dimension puller trucks
- All dimension Single/Multi axle vehicles

What we do

We provide individual logistic solutions, storage (warehousing), distribution logistics and outsourcing solutions.

We also engage ourselves with customers to understand their requirements and build solutions custom tailored to serve their needs.

Our service categories:

- Courier
- LTL
- FTL
- Temperature Controlled
- Line Haul
- Load Matching
- Hub Management

Goods we're into:

- Steel pipes, steel rods, steel sheets, steel coils etc.
- Products in packed bags like wheat, cement, rice, sugar, salt etc.
- Food items and other perishable products that requires refrigeration
- Coal
- Marble blocks, rocks, and minerals and more.

Mission Statement

1

Competitive edge
over legacy
transport systems

Cost reduction for
efficiency
(transports will no
longer be
overrated)

2

Optimizing supply
chain through
efficient delivery
system and
committed
timelines

3

Quality Service

4

Why us

Not just an exceptional service but a pleasurable experience while taking things online to keep you connected through the entire process from loading to delivery.

We exploit the best route management systems in the industry for prompt and safe delivery of your valuable goods.

We reduce costs at every node of expense to make transport cheaper and efficient.

Precision in planning the entire process.

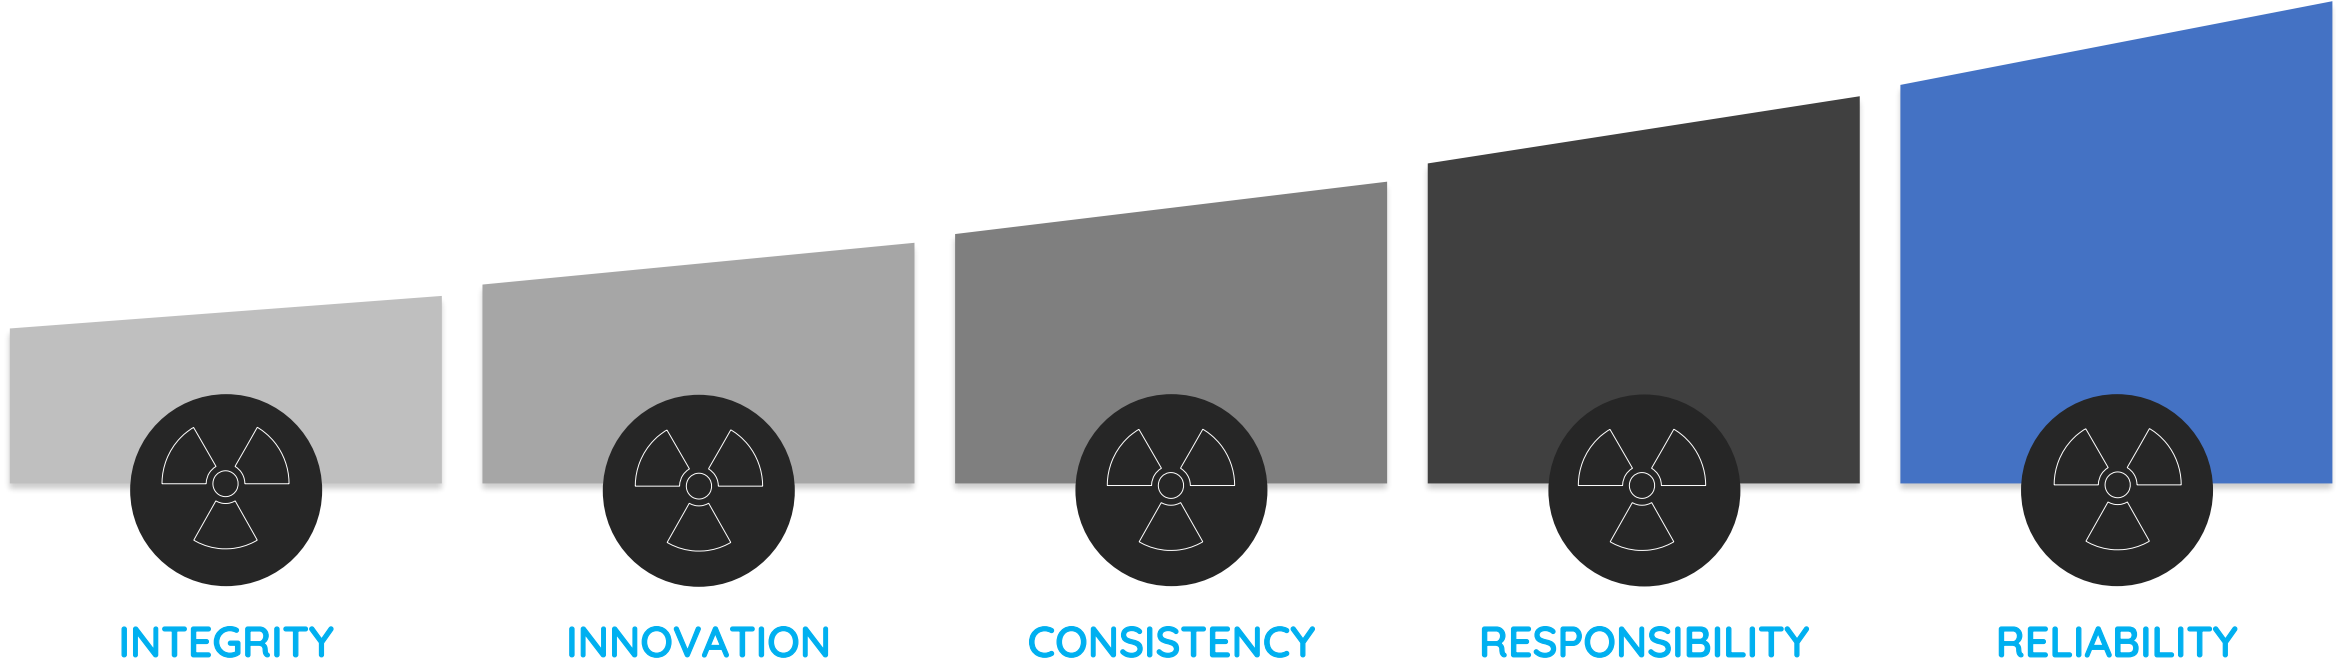

No compromises whatsoever, your business is as much important to us as it is to you.

Steady flow of trucks as per demand which means no waiting and no compromises on timely truck unavailability.
